5 Complete the text with the correct relative pronouns. There may be more than one correct answer.

SHOOTING THE CLOUDS

China is a country [1] ... has had many problems with drought in the past. To solve this problem and to help farmers [2] ... need rain to grow food, they started 'seeding' clouds. Seeding is a process [3] ... is done by injecting the clouds with chemicals. The chemicals cause the raindrops in the clouds to become bigger, so the clouds release them and it rains. The government has got an 'army' of 37,000 people [4] ... are experts in this technology. These people go around the country and cause rain in places [5] ... people need it. The Chinese used the same technology to prevent rain before the Beijing Summer Olympics in August 2008. August is a month [6] ... it frequently rains in Beijing. The Chinese didn't want the weather to ruin an event [7] ... could make a lot of money for their country. So they decided to seed any rain clouds [8] ... came near the city – but this time, they used chemicals [9] ... made the raindrops smaller and prevented rain.
